COMPUTER EXPLORERS ANNOUNCES NEW PRESCHOOL TECHNOLOGY PROGRAM – TECH TOTS!

.....

Spring, Texas (May 14, 2007) – COMPUTER EXPLORERS (CE), the company that is leading the way in computer technology education worldwide and was recently **ranked #1 in *Children's Technology by Entrepreneur Magazine***, announces an addition to its COMPUTERTOTS® preschool program. TECH TOTS will be available to preschools from the fall of 2007.

Do your three-year-olds love the computer, but get frustrated when the mouse doesn't go where they want it to go? Or do they click too many times, and the action gets frozen?

CE's unique 12-session course will have your 3's ready to teach their parents the tricks of technology!

Following CE's proprietary scope and sequence, the young students will learn basic computer operations, familiarize themselves with the keyboard, practice desktop skills with pull-down menus...and HAVE FUN!

At the end of the course, each student will take home a multimedia slide show that demonstrates their new skills!

Watch out, Bill Gates!! The new generation is on its way!!

"Young children are enamored by the computer," said Deb Evans, president of the COMPUTER EXPLORERS international company. "If we can decrease their frustration and channel their excitement, they will be eager to explore new technology throughout their lives."

Kay and Mal Shakespeare, owners of CE serving Montgomery and North Harris Counties since 2004, are excited to be able to offer this new and unique program to the three year olds at preschools in the area.

“As an educator myself,” reports Kay, “I appreciate that this curriculum is designed specifically for 3’s with age and developmentally appropriate activities. Each week the children explore ‘places I go’... to a birthday party, school, swimming or even to bed! They have such fun discussing what they like to do, and then creating artwork to show it! And all the time they are practicing their computer skills.”

Since 1984, COMPUTER EXPLORERS business owners and their teachers have taught more than three million classes; today some 600 teachers in 33 states and internationally teach tens of thousands of students each week from ages two to adult!

For more information about how COMPUTER EXPLORERS can enhance your technology program from TECH TOTS to robotics to staff development, contact Kay or Mal Shakespeare at 877-468-2823 or by email at info@tTechEd4All.com. More information about our other programs can be found at www.TechEd4All.com.
